Short clip that presents a project of our program: A new world-class hub for clinical research and precision medicine

🔗 To learn more about FACS: https://lnkd.in/d2Gihbe5

CQDM presents the successful project led by Jean-Claude Tardif, Director of the Institut Cardiologie de Montréal's research center, in collaboration with Marie-Pierre Dube, Director at Pharmacogenomics Centre at Université de Montréal.

The $17.45 million initiative aims to create a world-class hub for clinical research and precision medicine in Quebec in the cardiovascular field, and then to extend it to other fields. The initiative is supported by a large network of public and private collaborators and is funded by the Ministère de l'Économie et de l'Innovation du Québec (MEI).

A project conducted in collaboration with:
- DalCor Pharmaceuticals
- Perceiv AI
- Fondation de l'Institut de Cardiologie de Montréal
- Pharmascience
- AstraZeneca
- Bayer
- Hôpital Maisonneuve-Rosemont
- McGill University
- Centre d'excellence sur le partenariat avec les patients et le public
- Centre de recherche du CHUM (CRCHUM)
- Université de Montréal
- Centre of Excellence on Partnerships with Patients and the Public (CEPPP)
- Montreal Health Innovations Coordinating Center (MHICC)
